Applicant  
IGT

1. This opinion contains indications relating to the following items:

- Box No. I Basis of the opinion
- Box No. II Priority
- Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- Box No. IV Lack of unity of invention
- Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- Box No. VI Certain documents cited
- Box No. VII Certain defects in the international application
- Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.  
PCT/US2004/030089

**Box No. I Basis of the opinion**

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  
 This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material:  
 a sequence listing  
 table(s) related to the sequence listing
  - b. format of material:  
 in written format  
 in computer readable form
  - c. time of filing/furnishing:  
 contained in the international application as filed.  
 filed together with the international application in computer readable form.  
 furnished subsequently to this Authority for the purposes of search.
3.  In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

**WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY**

International application No.  
PCT/US2004/030089

**Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or  
industrial applicability; citations and explanations supporting such statement**

**1. Statement**

Novelty (N)	Yes: Claims	
	No: Claims	1-27
Inventive step (IS)	Yes: Claims	
	No: Claims	1-27
Industrial applicability (IA)	Yes: Claims	1-27
	No: Claims

**see separate sheet**

**WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING  
AUTHORITY (SEPARATE SHEET)**

International application No.  
PCT/US2004/030089

**Re Item V**

**Reasoned statement with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement**

**1. Article 6 PCT :**

The multiplicity of definitions of the invention given in independent claims **1, 8, 18, 25** is contrary to the requirements of Article 6 PCT. A European patent application may contain more than one independent claim in the same category only if the subject-matter of the application involves (a) a plurality of inter-related products (such as a plug and a socket), (b) different uses of a product, or © alternative solutions to a particular problem which cannot be covered by a single claim. None of these apply to the present application.

Moreover, the claim set should be formulated concisely. Further, a diversity of wording for defining one and the same invention should be avoided in order not to render the claims inconsistent with each other and thus unclear.

Consequently, in the present case, it is appropriate to use only one independent claim per category.

**2. Article 33(2) PCT :**

Reference is made to the following documents:

- D1: WO-A-0 199 067 (INT GAME TECH) 27 December 2001
- D2: EP-A-1 343 125 (WMS GAMING INC) 10 September 2003
- D3: US-A-5 762 552 (VUONG SON THANH ET AL) 9 June 1998

The document D1 is regarded as being the closest prior art to the subject-matter of **claim 1**, and this document shows the following features thereof (the references in parentheses applying to this document):

A gaming unit (**Figures 1-7**) for conducting a multi-player wagering game over a gaming network (**Figures 1-7**), the gaming unit comprising a plurality of gaming units

(**Figures 1-7**), comprising an input device (**Figures 1-7**) for inputting a plurality of input selections: a display device (**Figures 1-7**); a gaming controller (**Figures 1-7**) operatively coupled to the input device and the display device; and a network computer (**Figures 1-7**), said network computer comprising a memory device (**Figures 1-7**), a controller (**Figures 1-7**) operatively coupled to the network computer memory device and each of the gaming unit controllers.

Thus, all the above technical features are known from the available prior art and lack novelty under Article 33(2) PCT.

It has to be noted that D2 (see [0026]-[0036]) and D3 (Figures 1-3) also explicitly disclose the above claimed technical features, thereby attacking novelty under Article 33(2) PCT.

3. Article 33(3) and Rule 6.3 (a)-(c) PCT :

The remaining features of claims 18 and 25 are mere programming instructions of the gaming unit controller, said programming instructions being meant for conducting "a wagering game".

However, those features relate to the mere implementation of some game according to its rules. Hence, those features do not contribute to solving any technical problem within the meaning of Rule 6.3 (a)-(c) PCT and thus cannot be taken into consideration for assessing the presence of an inventive step under Article 33(3) PCT.

4. In summary, as far as the present application can be understood, the examiner is of the opinion that the subject-matter of the claims is merely the implementation of some game according to its rules and the representation of particular information. Furthermore, only well-known or generic functional means, such as wheels, reels, indicia, speakers, standard gaming unit, various display devices, means to receive input from players, et cetera, are used to those ends.

Rules and methods for playing games and presentation of information are, taken

**WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING  
AUTHORITY (SEPARATE SHEET)**

International application No.

PCT/US2004/030089

alone, not regarded as inventions (Article 17(2)(a)(ii) and Rule 39(1)(iii)) and can neither lend any technical character to the claims nor contribute to the solution of any technical problem. The other commonplace technical features of the claims do not offer any solution to any technical problem, even in combination with each other or with the non-technical features of the claims.

Therefore, there is no technical problem to be solved (Rule 6.3 (a)-(c) PCT), so that no inventive step is involved in the subject-matter of the claims (Article 33(3) EPC).

Thus, it was not possible to find any subject-matter in the application which could be regarded as potentially allowable under the Articles and Rules of the PCT.
